

① Fold a (horizontally placed, A4 sized) piece of paper along the y-axis in half and glue the surfaces together.

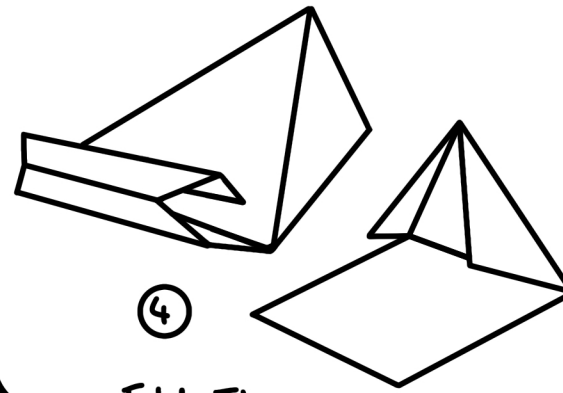

② Draw these lines on the front and back. They are a guide for cutting and folding.

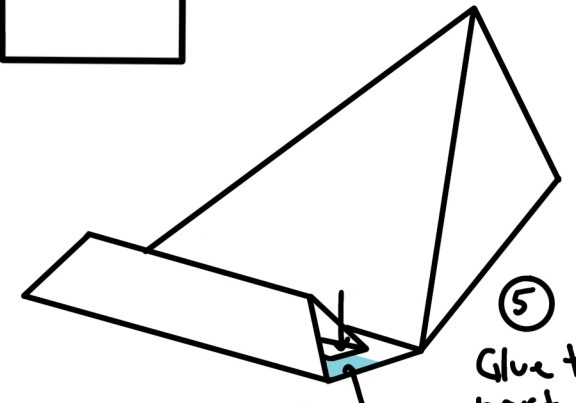

③ Cut along the red lines.

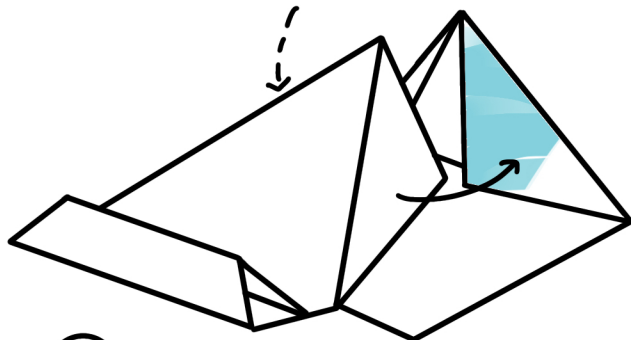

These pieces won't be needed anymore.

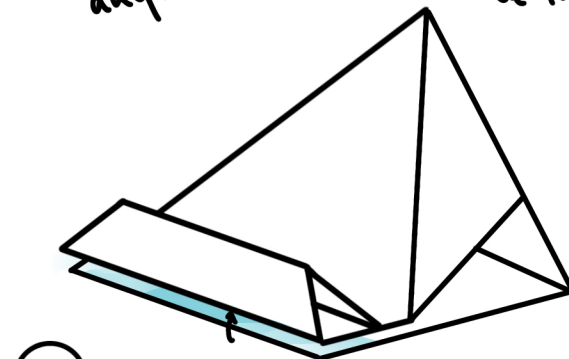

④ Fold. The dashed lines should be inside while folding.

⑤ Glue this part to create a small prism.

⑥ Overlap and glue the triangles. Repeat this on the other side.

⑦ Glue the bottom of the prism to the larger surface for stability.
